

George Washington University Provides Many Political Knowledge Competencies To Its Students

Husni Noor Affan

Political knowledge development is one of the key elements to a successful career in government or law. The political arena encompasses a vast area of knowledge and expertise that is relevant to a wide variety of policy issues and areas. The knowledge of the political arena is broad and covers not only the political system of countries but also the diverse cultures and beliefs of citizens from different countries. Politics can be extremely complicated and it is important for an individual who wishes to pursue a political career to gain a solid foundation in political science as well as in other key areas.

There are many institutions and organizations that have political knowledge development programs and resources for students and other individuals interested in political study. The best way for a person to develop his political knowledge is to first determine what type of political knowledge development work would be most beneficial to him. There are various degrees available for political studies, including doctoral programs and professional doctorate programs. The programs are designed to train individuals for specific political positions in the future. A master's degree is usually a higher level of education than a doctorate program, but both degrees provide extensive training in political theory as well as in specific areas of political science and administration.

Many universities and community colleges offer political knowledge development programs. Community colleges often run political courses as part of their requirement for students to obtain a degree. Students take these courses to improve their understanding of politics and learn how to communicate politically effectively. They also learn about the history and principles of political thought and how they inform contemporary political debate.

The University of Chicago runs a Political Knowledge Program that serves students interested in pursuing a doctoral degree. The program offers a number of tutorial sessions and seminars on various political topics, including constitutionalism, representative government, international political debate, the American government at the national, state, and local levels, and political culture. The program also has a number of prominent faculty members including John King and political scientist Max Weber. The program enables students to develop comprehensive political knowledge sets with the goal of preparing them for careers in research, political communications, teaching, law, and policy analysis.

George Washington University has a political education department that develops curriculum with an increased focus on political knowledge. Some of the core courses

include American government and political system, constitutional government and the legislative process, the role of political institutions in American society, political systems and political culture of various geographic regions, and political leadership and policymaking. Other important political courses offered at George Washington University are Public Policy and the Process of Power, Colonial-American political theory, Congress and the Executive Branch, Federalism and the Constitution, and Conflict and Negotiation in American Politics. The Department of political science also offers a number of courses in political science, public policy, and psychology of politics. Many of the psychology courses are designed to prepare students to enter careers as psychologists or political scientists.

An interesting course at George Washington University is taught by Larry Sabato, who has authored five best-selling books on political issues. In this class, students will learn about U.S. foreign policy, the development of democratic governments around the world, the history of constitutional freedom, and the role of the media in political communication. Students will also gain extensive political knowledge by examining the successful campaigns of Barack Obama and John McCain for U.S. President. This class gives students a thorough understanding of how candidates win elections and why they will be re-elected. It is also a good class for people who want to develop political skills or become campaign managers.

Another course offered at George Washington University is George Washington University's College of Government which was created to enhance students' basic knowledge about government. Students can choose to participate in either a one-credit or two-credit program in which they learn about history and government, research methods, and political communications. This class can also provide an environment in which students can develop political skills such as persuasive writing, critical thinking, and teamwork. In this class, students will also receive training in problem solving and decision making. In addition, students can choose to register for a range of electives including American government, constitutional history, government studies, and global studies.

George Washington University also offers student organizations such as the College Democrats, the George Washington Union, and George Washington University Graduate Students' Association. In addition, the school holds political science clinics once a quarter. At these clinics students will be able to meet with current political leaders in addition to obtain relevant political knowledge and meet other students who are also interested in politics. Students who wish to conduct political research should consider enrolling in one of their courses, which are taught by scholars with more experience in this area.
